

VINEETH B. PRASANNA

Senior Technical Security Engineer

+49 17665574727 | vineeth@bharadwaj.de | Ingolstadt, Germany

github.com/iamvineeth23 | <https://bharadwaj.de>

SUMMARY

Senior cybersecurity engineer with **7+ years of experience** across product security architecture, vulnerability management and offensive security. Currently leading cross-platform security technologies and ECU cybersecurity at CARIAD across multiple vehicle platforms.

OSCP+ certified with additional expertise in AI/ML-assisted security testing, cybersecurity regulation and technical security leadership across multi-organisation engineering programs.

WORK EXPERIENCE

CARIAD SE, Germany
2022 - Present

Senior Technical Security Engineer

Security Technology Lead - Secure Onboard Communication (SecOC)

- Leading a team of 4 defining and delivering the cross-functional strategy across 15+ ECUs and 3 vehicle platforms across the VW Group.
- Own the end-to-end security technology across the complete V-model lifecycle, delivering across multiple vehicle platforms through SOP.

ECU Security Lead

- Own and lead cybersecurity for the Gateway ECU, implementing security technologies, aligning suppliers, and internal stakeholders to achieve ECU and platform security goals.
- Lead end-to-end product security across the complete V-model lifecycle, & achieved successful SOP milestones.

PPE/PPC Vulnerability & Risk Management

- Designed & established the PPE/PPC platform vulnerability & risk management framework, coordinating vulnerability assessments, remediation across 3 VW Group brands and 10+ ECU SOPs.

China GB/T Security Platform Homologation

- Established a cross-dimensional requirements traceability framework for China cybersecurity homologation by coordinating with Chinese government authorities.

Offensive Security

- Conducted security testing on various features and functions of PPE/PPC Electronic Control Units (ECUs).

Audi AG
2019 - 2022

Technical Security Engineer

Offensive Security

- Conducted security assessments & penetration testing in Audi Security Lab, identifying vulnerabilities across automotive systems.

AI-Assisted Security Tooling

- Developed security testing tools and integrated AI/ML approaches to improve & automate security testing workflows.

Graduate Trainee

- Built detection lab for Audi CERT team with Splunk integration for forensic analysis of security incidents.
- Built PoC for generative AI design tool using GANs for Audi Design Engineering team.

PROFESSIONAL TRAINING

- OSCP+ - OffSec Certified Professional [Certificate]
- SANS SEC542 - Web App Penetration Testing and Ethical Hacking
- SANS SEC560 - Network Penetration Testing and Ethical Hacking
- SANS SEC556 - IoT Penetration Testing

TALKS & GUEST LECTURES

- Sec.SDV Europe 2026 - Closing the Vulnerability Management loop for SDV
- Sec.SDV Europe 2025 - Beyond Regulations: Proactive Vulnerability Management for SDV
- Secure Our Streets 2024 - Shifting Left Vulnerability Management (Youtube)
- VulnCon24 - Finding Managing & Preventing Vulnerabilities: An Automotive Perspective (Youtube)
- FAU Erlangen University (WS23 & WS24)- Finding, Handling & Preventing Automotive Software Vulnerabilities

EDUCATION

RWTH Aachen University, Germany2016-2019	Master’s in Simulation Science Special focus on artificial intelligence, parallel programming, and optimization techniques. Master’s Thesis, and Work Student Audi Electronics Venture GmbH, Germany Artificial Intelligence assisted Fuzzing - integration of AI into automated software fuzzing, and evaluating performance of various AI models.
Vishveshwarya Technological University, India2011-2015	Bachelor of Mechanical Engineering Ranked 1st in graduating class; Gold Medalist - CGPA 9.32/10.

SKILLS	Professional	Language
	- AI / Machine Learning - Penetration Testing - Homologation - Technical Leadership	- Product Security - Vulnerability Management - Risk Management - Requirements Engineering - English (C2) - German (B2) - Hindi (Native) - Kannada (Native)
